

Master of Education in Special Education

General Emphasis

The *Master of Education* degree program provides a range of opportunities for practicing teachers and other educators to develop their unique skills in order to increase teachers' impact on students. This degree has been developed to build a solid foundation of knowledge, skills, and understanding for *dedicated experienced professionals*. This program is founded on a deep respect for practicing educators and is committed to strengthening and renewing their teaching through a process of increasing knowledge and professional capacity, self-evaluation and reflection on their own practice. We seek to foster teachers who care deeply about students, create appropriate learning environments, and develop their own skills in order to nurture the greatest human potential in each learner. The graduate of this program will have a deep commitment to the professional education community, a focused association with the school community and a strong connection to educational research.

Program Goals

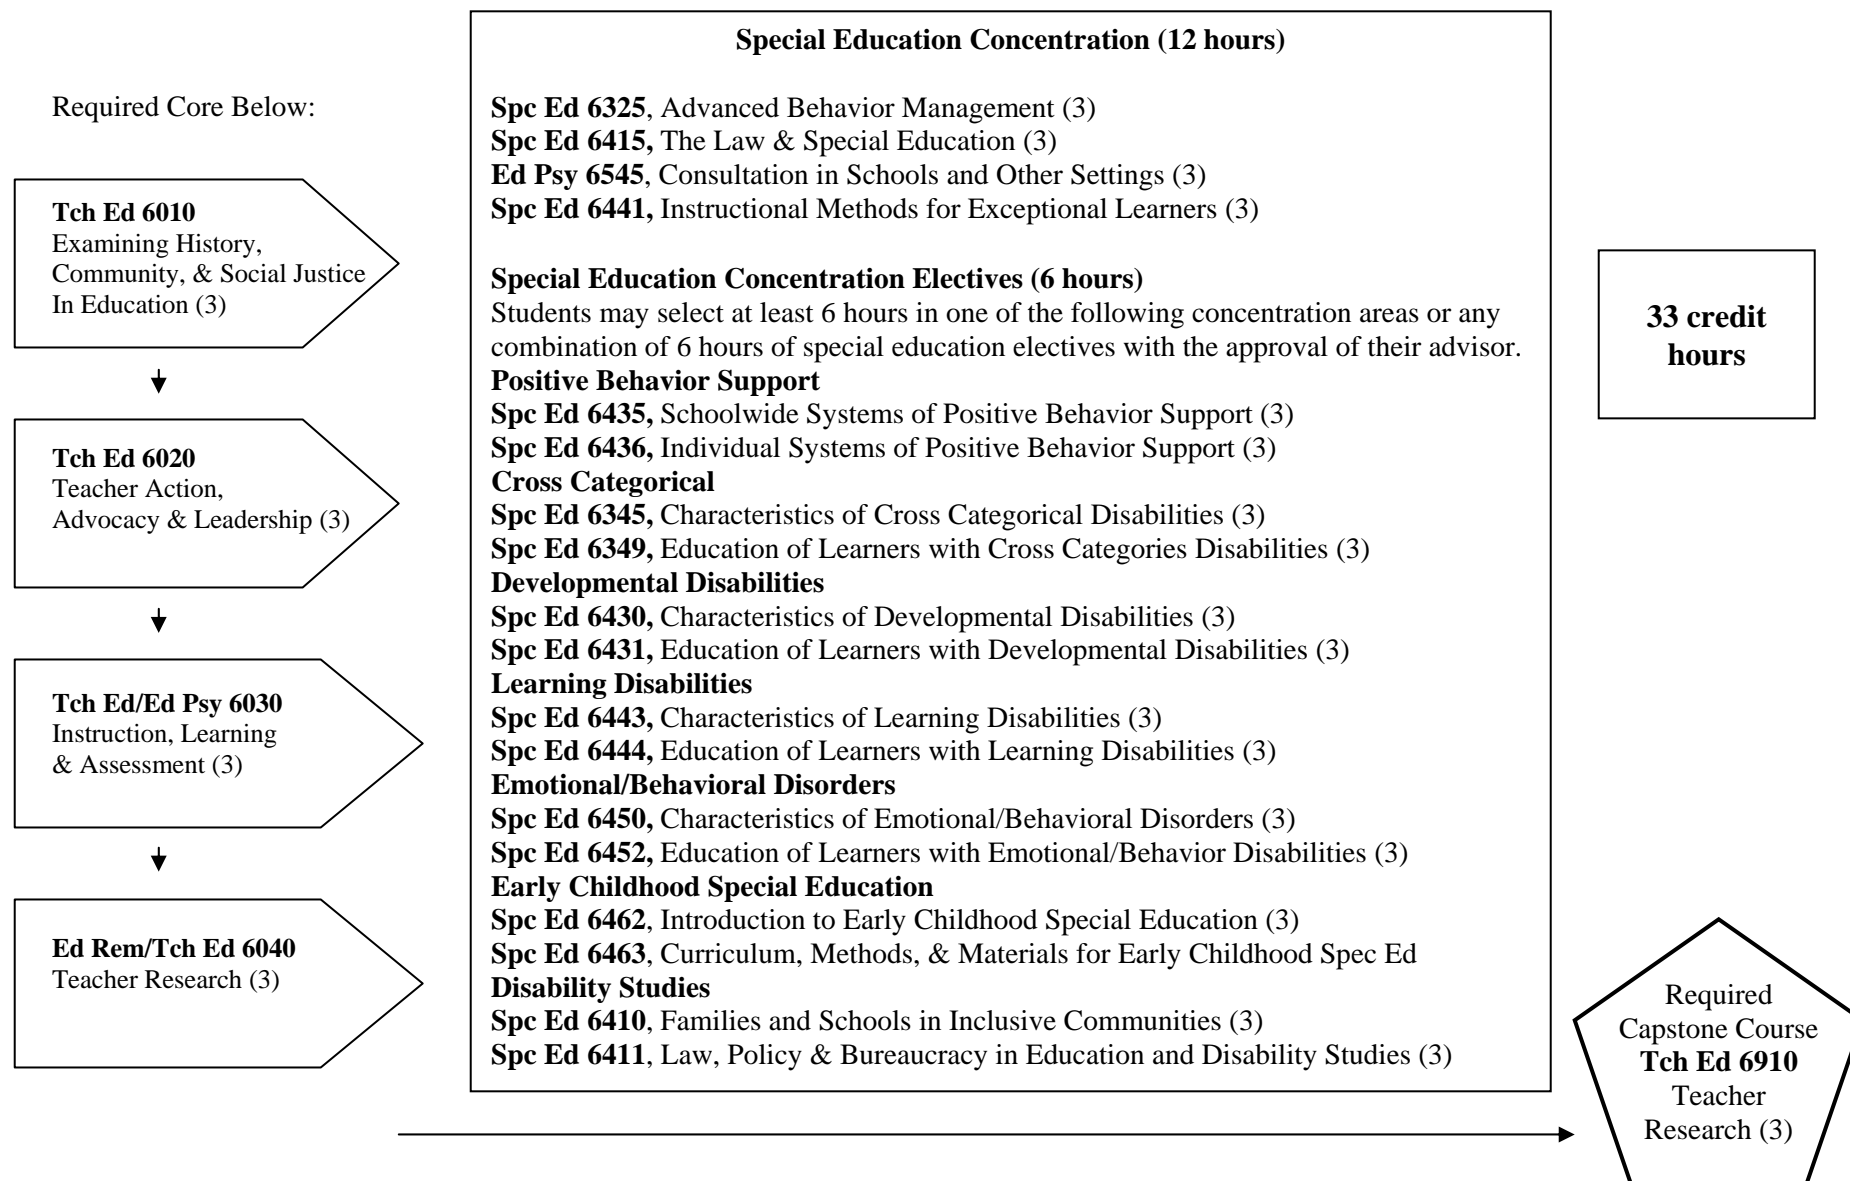

1. Enhance the depth of knowledge relating to the teaching and learning processes.
2. Further develop the tools of inquiry and knowledge of research methods necessary to improve their practice throughout their career.
3. Critically examine professional practice from the standpoint of effectiveness with all students.
4. Refine and develop capacity for critical thinking and investigation.
5. Construct dynamic processes and resources that promote the development of quality learning programs for all learners.
6. Develop interpersonal qualities that engage a wide range of learners and personally connect to individual students.
7. Examine and refine professional ethics so as to influence the community toward social justice and increased equity for all students.
8. Increase professional resilience and proficiency in teaching to become an accomplished teacher.

The **M.Ed. Program in Special Education** includes a representation of the important core knowledge in Special Education. The primary goal is to empower professionals to be thoughtful teachers who use best practice when working with students with disabilities. Research and data-based decision making are emphasized throughout the program. Graduate students will translate research into practice in multiple courses and learn to analyze multiple types of assessment data.

When graduate students are accepted into the program they are required to have their transcripts analyzed for state certification discrepancies. Students who wish to be certified in cross-categorical disabilities will be required to fulfill general certification requirements as well as graduate coursework. Upon completion of this advanced degree, professionals will have developed an in-depth knowledge base related to

- various learning contexts within and outside of the school setting
- the multiple influences on educational practices in schools
- the characteristics and instructional needs of learners with disabilities
- assessment strategies for monitoring instruction
- instructional best practice
- using research to direct practice in the classroom
- diversity
- contexts that affect student learning
- the powerful interactions between setting events and specific learner outcomes
- a life-perspective of students with exceptional learning needs that addresses the need to successfully meet the needs of young children who transition into kindergarten as well as preparing older students for their transition into adulthood.

The Master of Education in Special Education (effective Fall, 2007)

For more information, call the Graduate Education Office at 314-516-5483, come to 123 So. Campus Classroom Building on the UM-St. Louis South Campus, or e-mail gradeduc@umsl.edu.
